Why Computer Science ?

Because
Fun + Jobs

Jobs

Basically all Public and Private sectors require **C**omputer **S**cience experts with a variety of skills. **Now there is a lack of CS experts at *any* level!!!**

Banks and Public Administration (e.g., Unicredit, Fineco, ...)

Software Companies (e.g., Google, Facebook, LinkedIn, Accenture, IBM, Engineering, NTT Data, ...)

Space and Defence (Lazio among largest R&D centers in Europe) (e.g., Thales Alenia Space, MBDA, Elettronica, ...)

Cybersecurity (e.g. Leonardo, ...)

Telecommunications (e.g. Telespazio, TIM, WIND, ...)

Transportation (e.g., Intecs, United Technologies, RFI, Bombardier, Alstom, ...)

Automotive (e.g., Ferrari, Magneti Marelli, Huawei R&D Pisa, ...)

HealthCare (e.g., Bayer, esqLab, ...)

Research @ Sapienza CS

Research at Sapienza Computer Science Department covers most of main stream Computer Science areas. Here are examples.

Algorithms
Artificial Intelligence
Bioinformatics
Block Chains
Cloud Computing
Computer Networks
Computer Programming
Computer Vision
Computer Graphics
Formal Methods

Database
Distributed Systems
High Performance Computing (HPC)
Human Machine Interfaces
Machine Learning
Quantum Computing
Social Networks
Software Engineering
Security
Theoretical Computer Science
Web

Where are now our students?

THANKS
